Experience

2013 — present

Jan 2020 — Current

Senior Software Developer

Samsung SmartThings — San Francisco, CA

- MQTT messaging infrastructure for connected devices at scale.

Jan 2018 — Dec 2019

Senior Software Developer

Samsung Research America — San Francisco, CA

- Implemented the MQTT cloud offering with a globally distributed team.
- Point-to-point messaging, performance testing and optimization.
- Kubernetes support for long-lived TCP connections.
- Distributed tracing and support for CBOR Web Token.

Sept 2016 — Jan 2018

Software Developer

Samsung Semiconductor Inc — Paris, France

- Samsung ARTIK Cloud — enabling developers to use and access IoT data.
- Owned the accounts service: new OAuth method, security fixes, cross-region availability.
- Designed and built the ARTIK Cloud API Gateway and the OpenAPI docs/SDK infrastructure.

Jan — Jul 2016

Intern Software Developer

Samsung Semiconductor Inc — San Jose, CA

- Improved scalability by moving services to Redis Cluster.
- Improved robustness with asynchronous error and failure handling.
- Prepared cross-datacenter Redis replication.

Feb — Jul 2015

Intern Video Games Developer

Metidia — Paris, France

- Built features for the client (Backbone.js, CreateJS/Canvas) and backend (Sails / node.js).
- Designed AWS container infrastructure supporting 10k new players / month.

May — Aug 2013

Intern Java Developer

Alter Frame — Versailles, France

- Learned JavaFX and delivered the product within the internship.
- Brought agile methodology; evangelized testing across new and legacy projects.

Skills

BACKEND

Scala, Java, Rust
